

TRIMBLE ACCOUNTING APP TECHNICAL NOTES

The Trimble® Accounting App allows users to manage registered users, contracts, and subscriptions. The Trimble Accounting App operates on the Trimble Pivot™ platform, the foundation for multiple Infrastructure apps that serve various markets and their specific needs.

TRIMBLE ACCOUNTING APP

The Trimble Accounting App enables network operators to view and manage user subscriptions and review usage information, making it easy to administer subscriptions and support service users.

A contract defines a set of services which may be accessed. A subscription enables a user to access services under a given contract using a data resource for a specified interval of time or a fixed maximum period of cumulative connect time for a streaming service. The user can use the Trimble NTRIP Caster App for real-time and the Trimble Data Shop App for postprocessing. Active and expired subscriptions may be viewed, making it easy for the network operator to administer user contracts, subscriptions, renewals, and billing information.

In addition, an accounting history view provides a real-time and a historical summary of login usage, including number of connections by registered users, data usage, and rover positions.

other departments. For example, the Accounting and the User Management tools can be provided to the accounting department in your company as they are more aware of the subscription and account details, rather than to the network operator. This ability provides an ideal method to streamline responsibility and increase productivity between network operators, accounting, and user management specialists.

TRIMBLE ACCOUNTING APP STATUS VIEW

The App Status View provides relevant account information such as the number of registered users, contracts and subscriptions along with an accounting history. The App Status View assists the operator in analyzing critical and non-critical situations in real-time to better assist field end users. This smart and interactive feature will point you to the exact module and functionality you want to analyze. The traffic light indicator provides a high level application status summary.

User Management tool in Trimble Pivot Web Application

TRIMBLE ACCOUNTING APP PAGES IN TRIMBLE PIVOT WEB APPLICATION

The Trimble Pivot platform includes a basic web installation. Some licensed apps add their own web pages providing additional functionalities. The Trimble Accounting App web pages offered through the Pivot Web Application provide an independent and easy-to-use interface for the administration of users, subscriptions and contracts. The following web pages are available for the Trimble Accounting App:

- Active Subscriptions
- Advanced User Management
- Register User
- Statue Messages
- Regions
- Organization management
- Role Management
- Sessions

The separation of the Pivot user interface and the Web Application enables the sharing of the different web pages and its tools and features with people in
