

Getting Started with FieldLink MR

1

Prep

Upload your data to Trimble Connect for seamless access in the field

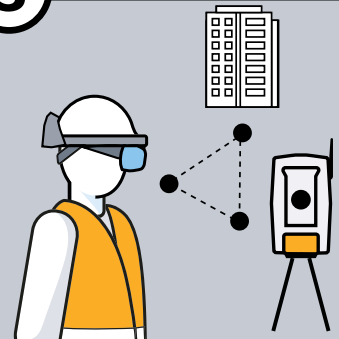

2

Connect

Connect to your instrument with either Radio or Wifi

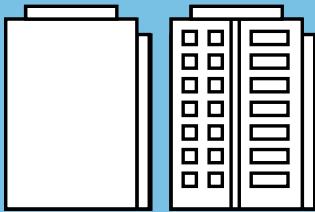

3

Setup

Complete your instrument setup and model alignment in one fluid process

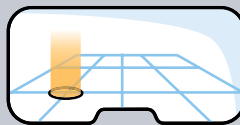

4

Visualize

Keep things clear by turning on or off various layers of the point file or model. Toggle the model transparency to customize your experience to your exact preferences

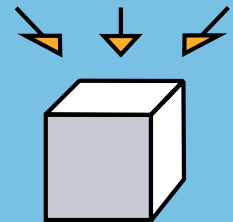

5

Layout

Pick a point from anywhere in front of you, or find a specific point from the layout list. Follow the immersive directions to easily layout your points

6

Collect

Perform contextual QA/QC workflows by capturing as-built information live in the field. Compare the status of construction against the design and capture any differences immediately
